Pharmacy Technician Review and Test Preparation

Marvin M. Stoogenke

A review book for the National Pharmacy Technician Certification Examination. This book is composed of an abundance of questions testing the roles, duties, and responsibilities of the pharmacy technician. Section I focuses on the traditional distributive pharmacy activities which involve the processing of drug orders. Measures depth of overall knowledge in processing new orders or refills. Includes review for prescription authenticity. Also includes product knowledge, including drug name, calculations, conversions, and terminology. Section II deals with Medication Distribution and Inventory Control Systems.
