Prolific author Joseph P. Farrell, who commands a growing and devoted audience on Coast to Coast AM, Erskine Overnight, and other programs, initiates his Feral House association with The Philosophers Stone, in which he demonstrates the connections of modern physics and ancient alchemy by investigating monatomic gold, the work of Russian astrophysicist Nikolai Kozyrev, and the fuel for the mysterious Nazi Bell device, Serum 525. Farrells previous books investigated the scientific and astronomical implications of ancient monuments and the secret space operations of the Nazis who were brought into NASA to continue their highly classified research as a result of Operation Paperclip. The author is now working with best-selling authors Richard C. Hoagland and Mike Bara on a book about secret American space programs. Chapters within The Philosophers Stone include: The alchemical view of the physical medium, Transmutations and time, David Hudsons Monatomic Gold, The Platinum Group Metals and High Spin State Atoms, An Alchemical Examination of the Soviet Red Mercury Legend, The Physics of Rotation: Dr. Nikolai Kozyrev, H-Bombs and Torsion Physics, The Greater German Alchemical Reich, Nazis, Lasers, and Isotope Enrichment, The Bell and Serum 525.
